MontyCloud

The trusted, autonomous CloudOps platform

A more efficient and secure platform for your multicloud environments.

WHY ENTERPRISE CLOUD TEAMS FALL BEHIND

Spend
21%[1]
of enterprise cloud infrastructure spend is wasted

Security
$4.99M[2]
average cost of a data breach, up 12% in a year

Talent
74%[3]
report a shortage of qualified security staff

Governing AI
79%[4]
lack a mature governance model for agentic AI

WHAT MONTYCLOUD DOES FOR YOUR BUSINESS

Operate
Every business unit runs on its own, while you get centralized visibility and set direction globally.

Optimize
Cut waste, close security gaps, and stay compliant, starting with the fixes that matter most.

Accelerate
Reach business outcomes faster, and give your team its time back.

AI GOVERNANCE **Governed AI, from pilot to production**

Governed AI is the engine underneath all three, and it acts only within the authority you grant.

- Permissions and approvals
- Audit trail on every run
- CloudOps Insights Platform, your system of record

An AI-native platform that works where you do

Build on MontyCloud, and use its data wherever your teams already work through the CloudOps API.

Connect to the tools your teams already love.

Reason across all of them at once.

Decide with MontyCloud's judgment engine.

Run where you work, with no context switching.

Customize the last mile, in the interface you prefer.

USE MONTYCLOUD IN MontyCloud · Claude · AWS Quick · MCP servers

Run more of your cloud with the team you have.
